## Curso de Búsqueda de Información Psicológica en Bases de Datos – 2021

Te invita a participar en los cursos de **Búsqueda de Información Psicológica en bases de datos** (duración 10 h), cuyo fin es contribuir al alcance de competencias (conocimientos, habilidades y aptitudes) que le permitan al estudiante y académico identificar sus necesidades de información y utilizar diferentes formatos, medios y recursos físicos o digitales.

**Se impartirán vía Zoom**, dos horas diarias, de lunes a viernes y para acreditarlo se tienen que cubrir 10 horas. Cupo mínimo para apertura del curso 6 personas, cupo máximo 10 personas.

FECHAS	HORARIOS
<b>SEPTIEMBRE</b>	
30 agosto al 3	10:00 A 12.00 h.
6-10	12:00 A 14.00 h.
20-24	17:00 A 19:00 h.
<b>OCTUBRE</b>	
27 septiembre al 01	10:00 A 12.00 h.
4-8	12:00 A 14.00 h.
11-15	17:00 A 19:00 h.
18-22	
25-29	
<b>NOVIEMBRE</b>	
8-12	10:00 A 12.00 h.
15-19	12:00 A 14.00 h.
22-26	17:00 A 19:00 h.
29 al 03 de diciembre	

Nota. Se pueden abrir cursos en horarios y fechas distintas a las establecidas, siempre y cuando los alumnos se organizan en un grupo de 10 personas y lo soliciten.

#### Frases para recordar

"La actitud mental es más importante que la capacidad mental"

Walter Dill Scott  
(1869–1955)

## Centro de Documentación “ Dr. Rogelio Díaz Guerrero” Libros digitales en LIBRUNAM

**Cruz Gaytan, José Ignacio. (2021). *Duelo*. México: Ultradigital Press.**

La experiencia del duelo después de una pérdida es una reacción humana universal y normal.

La mayoría de las personas se recuperan de la muerte de sus seres queridos sin gran problema. Sin embargo, las evidencias científicas muestran prevalencia de 7 a 20% de duelos que llegan a complicarse.

Este manual brinda directrices para que los profesionales de la salud puedan analizar la experiencia del duelo complicado, la identifiquen y puedan conducir una intervención que permita generar una actitud compasiva respecto al propio dolor, así como encontrar significado y valor más allá de la pérdida.

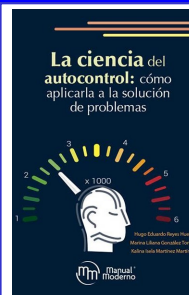

**Stone, Jessica. (2020). *Digital play therapy: a clinician's guide to comfort and competence*. London: Routledge.**

Digital Play Therapy focuses on the responsible integration of technology into play therapy.

With a respect for the many different modalities and approaches under the play therapy umbrella, this book incorporates therapist fundamentals, play therapy tenets, and practical information for the responsible integration of digital tools into play therapy treatment.

This book provides both the foundation and practical information for confident use of digital tools and brings play therapy, and therapy in general, forward into the 21st century.

**Reyes Huerta, Hugo. (2020). *La ciencia del autocontrol*. México: Manual Moderno.**

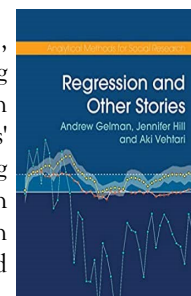

Este libro aborda conceptos muy importantes para las personas interesadas en comprender el por

qué los humanos en ocasiones tomamos decisiones que nos causan una serie de problemas derivados de no considerar y reflexionar todas las diferentes alternativas.

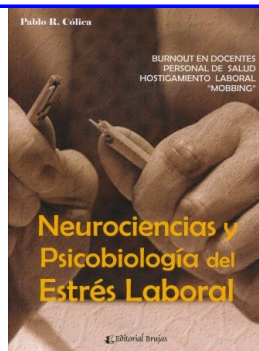

El autocontrol debe ser un principio básico que todo psicólogo debe aprender en el aula, porque está implicado en una serie de comportamientos que permite a las personas tener una vida saludable en todos los ámbitos. También es un comportamiento que se debe aprender desde las etapas iniciales de la vida pues, como se verá en cada uno de los capítulos, es central para la adquisición de hábitos sanos.

**Gelman, Andrew. (2021). *Regression and other stories*. London: Routledge.**

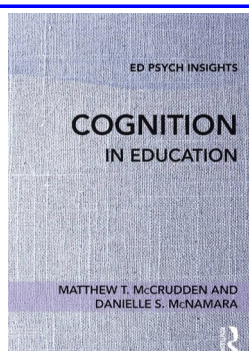

Most textbooks on regression focus on theory and the simplest of examples. Real statistical problems, however, are complex and subtle. This is not a book about the theory of regression. It is about using regression to solve real problems of comparison, estimation, prediction, and causal inference. It focuses on practical issues such as sample size and missing data. Real examples, real stories from the authors' experience demonstrate what regression can do and its limitations, with practical advice for understanding assumptions and implementing methods for experiments and observational studies. They make a smooth transition to logistic regression and GLM. The emphasis is on computation in R and Stan rather than derivations, with code available online. Graphics and presentation aid understanding of the models and model fitting.

**Toda, Yuichi. (2021) Tackling cyberbullying and related problems. London: Routledge.**

This book looks at innovative tools to tackle cyberbullying and internet-related problems (addiction, cybercrimes, etc.). The contributors have created preventative and intervention measures for children using games, apps, manga and anime videos, which are more accessible for children than textbooks or classroom-based lessons.

The contributors cover their experiences of developing these new approaches with children, parents and teachers as well as giving insights and evidence into how these innovative techniques and methods work. By sharing their expertise, the authors hope to improve the safety of children online.

**Wang, Sheng (2021) Cognitive choice modeling. Cambridge: The MIT Press.**

Cognitive decision processes provide the interface between the environment and brain, enabling choice behavior, and the basic cognitive mechanisms underlying decision processes are fundamental to all fields of human activity. Yet cognitive processes and choice processes are often studied separately, whether by decision theorists, consumer researchers, or social scientists. Author introduce a new cognitive modeling approach to the study of human choice behavior.

Integrating recent research findings from both cognitive science and choice behavior, they lay the groundwork for the emerging interdisciplinary field of cognitive choice modeling.

Defining Mental Disorder  
Jerome Wakefield and His Critics

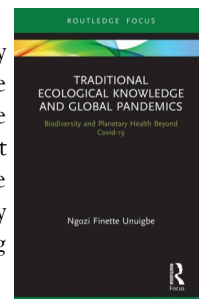

**Faucher, Luc. (2021). Defining mental disorder. Jerome Wakefield and his critics. Cambridge: The MIT Press.**

One of the most pressing theoretical problems of psychiatry is the definition of mental disorder. Jerome Wakefield's proposal that mental disorder is "harmful dysfunction" has been both influential and widely debated; philosophers have been notably skeptical about it.

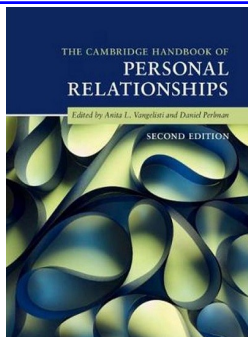

This volume provides the first book-length collection of responses by philosophers to Wakefield's harmful dysfunction analysis (HDA), offering a survey of philosophical critiques as well as extensive and detailed replies by Wakefield himself.

**Ngozi, Finette. (2021). Traditional ecological knowledge and global pandemics. London: Routledge.**

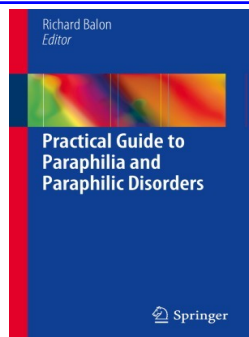

The reduction of species diversity has increased the risk of global pandemics and it is therefore not only imperative to articulate and disseminate knowledge on the linkages between human activities and the transmission of viruses to humans, but also to create policy pathways for operationalizing that knowledge to help solve future problems. Although this book has been prompted by the COVID-19 pandemic, it lays a policy foundation for the effective management or possible prevention of similar pandemics in the future. One effective way of establishing this linkage with a view to promoting planet health is by understanding the traditional ecological knowledge of indigenous peoples with a view to demonstrating the significant impact it has on keeping nature intact.

THE CAMBRIDGE HANDBOOK OF PERSONAL RELATIONSHIPS

PRACTICAL GUIDE TO PARAPHILIA AND PARAPHILIC DISORDERS

WELL-BEING: PRODUCTIVITY AND HAPPINESS AT WORK

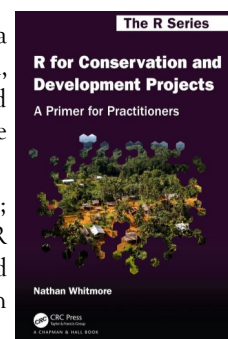

*Whitmore, Nathan. (2021). R for conservation and development projects. Boca Raton: CRC Press.*

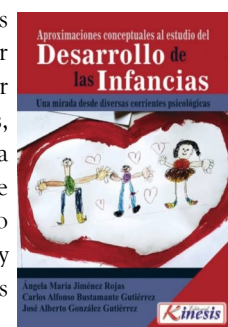

This book is aimed at conservation and development practitioners who need to learn and use R in a part-time professional context. It gives people with a non-technical background a set of skills to graph, map, and model in R. It also provides background on data integration in project management and covers fundamental statistical concepts. The book aims to demystify R and give practitioners the confidence to use it.

Key Features: Viewing data science as part of a greater knowledge and decision making system; Foundation sections on inference, evidence, and data integration; Plain English explanations of R functions; Relatable examples which are typical of activities undertaken by conservation and development organisations in the developing world; Worked examples showing how data analysis can be incorporated into project reports.

*Jiménez, Angela. (2019). Aproximaciones conceptuales al estudio del desarrollo de las infancias: una mirada desde diversas corrientes psicológicas. Armenia: Editorial Kinesis.*

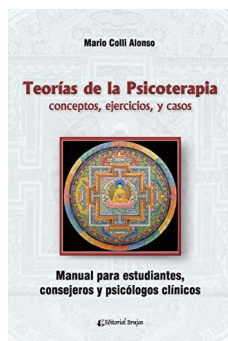

Las perspectivas, teorías, corrientes conceptuales son una especie de estuches de herramientas, algunas de estas son conceptos teóricos, otras son métodos de investigación, algunas son técnicas para evaluar la personalidad. Es a partir de esta idea que se construye el presente texto, con la intención de realizar una travesía por las diferentes corrientes psicológicas para comprender el desarrollo de las infancias, elaborando un recorrido histórico que dé cuenta de los logros intelectuales y hallazgos científicos para intentar describir, comprender y otorgar sentido al desarrollo de las infancias. Es relevante anotar, que el desarrollo de las infancias es asumido como un proceso dinámico, no lineal, secuencial o establecido de manera exclusiva por etapas o estadios; ya que, está permeado por las bondades y carencias del propio entorno sociocultural que conlleva a un continuo de asimilaciones, adaptaciones y reorganizaciones, que propicia el avance, retroceso, despliegue de singularidad y pluralidades.

*Colli, Mario. (2019). Teorías de la psicoterapia: conceptos, ejercicios, y casos. Córdoba, Argentina : Editorial Brujas.*

La psicoterapia está en un momento de gran desarrollo a nivel global. Hemos visto adelantos impresionantes en el desarrollo de las teorías, la práctica, la investigación y en la docencia. Muchas personas solicitan ayuda para mejorar su situación personal. Esta ayuda mediante la consejería y la psicoterapia pretenden afrontar pautas mal adaptativas en torno a las relaciones, la conducta, las emociones y los pensamientos que afectan el bienestar de la persona.

Este libro es una gran aportación al campo por su abarcadora cobertura de los conceptos centrales en la consejería psicológica, la amplia exposición de acercamientos teóricos a la consejería y la psicoterapia, por su orientación práctica y por su exquisita atención a la docencia mediante tareas y ejercicios para los y las estudiantes.

### Recomendación digital:

**MANUAL MODERNO:** Es uno de los mejores desarrolladores de contenidos científicos e instrumentos de evaluación para los profesionales de las ciencias de la salud y del comportamiento. Por medio del portal de la biblioteca digital de la UNAM y con la clave de acceso remoto, se puede leer en línea el texto completo de libros en las especialidades de psicología, medicina, enfermería, odontología y nutrición, etc.

*Taylor, Dianna. (2020). Sexual violence and humiliation: a foucauldian-feminist perspective. London: Routledge.*

This book presents humiliation as a key harm of sexual violence against women, showing that humiliation manifests within the relation of self to itself, and that Foucault's critique of subjectivity provides resources for feminist conceptualization and countering of sexual violence and humiliation.

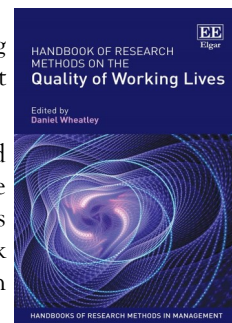

In addition provides such an account and analysis of both humiliation generally and sexual humiliation resulting from sexual violence more specifically. The book's elucidation of possibilities for countering sexual violence and humiliation, moreover, breaks with standard feminist approaches by critiquing rather than appealing to subjectivity. Through analysing specific instances of anti-sexual violence protest, it shows that cultivation of alternative modes of self-relation furthers rather than undermines feminist efforts to combat sexual violence.

*Wheatley, Daniel. (2019). Handbook of research methods on the quality of working lives. Northampton: Edward Elgar Publishing.*

The growing diversity of contemporary paid work has provoked increased interest in understanding and evaluating the quality of working lives. This Handbook provides critical reflections on recent research in the field, including examining the inextricable links between working life and well-being.

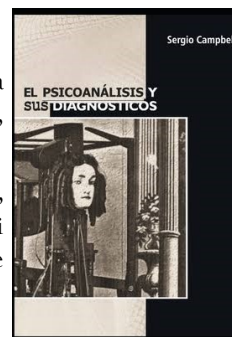

The Handbook offers comprehensive support to researchers working in quantitative, qualitative and mixed methods traditions. Drawing from an international evidence base, the contributors use examples of research into key contemporary issues such as the gendered nature of work, skills mismatch, job insecurity, work-life balance, flexibility, the gig economy and the physical work environment. Chapters explore how research methods have been used to investigate aspects of both paid and unpaid work, raising further questions and highlighting limitations.

*Campbell, Sergio. (2019). El psicoanálisis y sus diagnósticos. Córdoba, Argentina: Editorial Brujas.*

Si el psicoanálisis se trata de una práctica cuyo efecto es una transformación subjetiva; y si dicha práctica es posible por el deseo del analista, que es lo que permite la instauración de la transferencia, motor de la experiencia analítica, ¿cuál sería el beneficio de utilizar diagnósticos?

Si tal como afirmara Lacan, que toda resistencia es la resistencia del analista, los diagnósticos, ¿no serían funcionales a la resistencia del analista? Y si esto fuera así, ¿a qué se resiste un analista, si no es a su propio deseo? 'Ser quemados por el fuego del amor, tal es el riesgo de nuestra profesión', le escribió Freud a Jung, y hablaba de la transferencia.

#### Psychological functioning in non-binary identifying adolescents and adults.

de Graaf, Nastasja M.

Gender Identity Development Service, The Tavistock and Portman NHS Trust, London, England.

**Abstract:** Gender diverse individuals who do not conform to society's binary gender expectations are more likely to experience difficulties in acceptance and in recognition of gender, compared to binary-identifying transgender people. This may accentuate the feeling that their gender identity is not socially recognized or validated. This study aimed to investigate psychological functioning among gender diverse adolescents and adults who identify beyond the binary gender spectrum. In both study populations, 589 clinically-referred gender diverse adolescents from the UK (n = 438 birth-assigned females and n = 151 birth-assigned males), and 632 clinically-referred gender diverse adults from the Netherlands (n = 278 birth-assigned females and n = 354 birth-assigned males), we found that a higher degree of psychological problems was predicted by identifying more strongly with a non-binary identity. For adolescents, more psychological problems were related to having a non-binary gender identity and being assigned female at birth. In the adult population, experiencing psychological difficulties was also significantly related to having a stronger non-binary identity and having a younger age. Clinicians working with gender diverse people should be aware that applicants for physical interventions might have a broader range of gender identities than a binary transgender one, and that people with a non-binary gender identity may, for various reasons, be particularly vulnerable to psychological difficulties.
