### Aviso

#### Día de la Salud Mental 2018

El tema elegido para el Día de la Salud Mental 2018 son los jóvenes y la salud mental en un mundo en transformación. En esta línea, la Sociedad Británica de Psicología (BPS-British Psychological Society) ha alertado de la existencia de *"una crisis sin precedentes en la salud mental de los jóvenes de hoy"*, lamentando que **más de la mitad de niños y adolescentes no reciben la ayuda que necesitan por parte de un profesional de la Salud Mental**. A este respecto, pone de relieve la trascendencia de la intervención temprana y la prevención, que evitaría, a posteriori, la cronificación de los problemas de Salud Mental.

Por este motivo, la plataforma Willey –plataforma digital de publicaciones de la BPS-, ha recopilado una serie de **artículos de investigación de revistas de Psicología, Neurociencia y Psiquiatría**, a través de los cuales se abordan diversas temáticas relacionadas con la Salud Mental, tales como, los factores de riesgo, el diagnóstico, el tratamiento y la recuperación, el bienestar, los cuidadores, entre otras muchas.

Todos los artículos se encuentran **disponibles de forma gratuita hasta el 31 de diciembre de 2018**, a través del siguiente enlace:

#### Frases para recordar

"La gente tiende a evaluarse comparándose con otras personas, no usando estándares absolutos"

Leon Festinger  
(1919–1989)

# Centro de Documentación "Dr. Rogelio Díaz Guerrero" Novedades bibliográficas

**Kenny, Dianna T. (2018). *Children, sexuality and child sexual abuse. New York: Routledge.***

The book analyze sexual development sexuality, and sexualized behaviour in children and adolescents. This is followed by an examination of the extent of child sexual abuse in the English-speaking world, and in once-trusted societal institutions including the Church, orphanages, and schools.

The book addresses questions such as: How and when do children disclose child sexual abuse? What are the effects of having experienced child sexual abuse? Finally, there is an examination of young people who offend sexually.

**Maddux, James E. (2018). *Subjective well-being and life satisfaction. New York: Routledge.***

The quality of people's relationships with and interactions with other people are major influences on their feelings of well-being and their evaluations of life satisfaction. The goal of this volume is to offer scholarly summaries of theory and research on topics at the frontier of the study of these *social psychological* influences—both interpersonal and intrapersonal—on subjective well-being and life satisfaction. The chapters cover a variety of types of relationships (e.g., romantic relationships, friendships) as well as a variety of types of interactions with others (e.g., forgiveness, gratitude). Also included are chapters on broader social issues such as meaning in life.

**Morley, Stephen (2018). *Single-case methods in clinical psychology. New York: Routledge.***

This book provides a introduction to single-case research, also covers the issues of design, the reliability and validity of measurement, and provides guidance on how to analyse single-case data using both visual and statistical methods.

Single-case designs can be used to investigate an individual's response to psychological intervention, as well as to contribute to larger scale research projects. The critical evaluation of single-case research is examined, from both the perspective of developing quality standards to evaluate research and maintaining a critical distance in reviewing one's own work.

**Muriel, Daniel (2018). *Video games as culture. New York: Routledge.***

This book explores video game culture, but in doing so, utilizes video games as a lens through which to understand contemporary social life.

Video games are becoming an increasingly central part of our cultural lives, impacting on various aspects of everyday life such as our consumption, communities, and identity formation. Drawing on new and original empirical data – including interviews with gamers, as well as media, education, and cultural sector – *Video Games as Culture* not only considers contemporary video game culture, but also explores how video games provide important insights into the modern nature of digital and participatory culture, patterns of consumption and identity formation, late modernity, and contemporary political rationalities.

**Furr, Michael (2018).** *Psychometrics.* London: Sage publications.

Using a meaning-based approach that emphasizes the "why" over the "how to," this work provides

thorough coverage of fundamental issues in psychological measurement.

Author Michael Furr discusses traditional psychometric perspectives and issues including reliability, validity, dimensionality, test bias, and response bias as well as advanced procedures and perspectives including item response theory and generalizability theory.

This third edition includes a glossary summarizing over 200 key terms, and expanded suggested readings consisting of highly relevant papers to enhance the book's overall accessibility, scope, and usability.

**Willig, Carla (2018)** *The Sage handbook of qualitative research in psychology.* London Sage publications.

This second edition provides coverage of the qualitative

methods, strategies, and research issues in psychology.

Responding to this evolving field, existing chapters have been updated while three new chapters have been added on thematic analysis, interpretation, and netnography. With a focus on methodological progress throughout, the chapters are organised into three sections:

- Section one: Methods
- Section two: Perspectives and techniques
- Section three: Applications

**Meyza, Ksenia (2018).** *Neuronal correlates of empathy. From rodent to human.* London: Academic Press.

*Neuronal Correlates of Empathy: From Rodent to Human* explores the

neurobiology behind emotional contagion, compassionate behaviors and the similarities in rodents and human and non-human primates.

The book reviews the latest research from the literature, and is essential reading for neuroscientists and others studying behavior, emotion and empathy impairments, both in basic research and preclinical studies. Though empathy is still considered by many to be a uniquely human trait, growing evidence suggests that it is present in other species, and that rodents, non-human primates, and humans share similarities.

**Miller Perrin, Cindy. (2018).** *Violence and maltreatment in intimate relationships.* London: Sage Publications.

Violence and Maltreatment in Intimate Relationships provides current and complete coverage of physical, sexual, and psychological abuse that occurs within intimate relationships. Authors Cindy L. Miller-Perrin and Robin D. Perrin, have created a streamlined organizational framework in Violence and Maltreatment in Intimate Relationships which presents information to students in an accessible manner.

The book offers both a sociological and psychological focus, examining traditional areas of interpersonal violence as well as forms of intimate abuse outside the family, and concludes with a call for appropriate social, legal, policy, and personal responses to address the problem of abuse in intimate relationships.

*Ostrosky Shejet, Feggy (2018). Cómo se debe resolver un crimen. CDMX: Editorial El Manual Moderno.*

Esta obra tiene como propósito, el análisis de la violencia, las repercusiones, las causas y los contextos del crimen, además de abordar el actuar de los profesionales frente a dichas amenazas: ¿Cómo debe actuar un criminólogo ante los actos que una sociedad ha decidido castigar? ¿Cuál es la responsabilidad de un victimólogo frente a nuestra realidad psicosocial, la cual mezcla crimen organizado con instituciones de procuración de justicia?

Se abordan estas cuestiones desde la formación y la experiencia de expertos en neurociencias, victimología, criminología, derecho y psicopatología, entre otras disciplinas. Sus autores disponen de la experiencia que brinda el trabajo directo con víctimas y agresores; han realizado intervenciones clínicas, han dado atención directa a las poblaciones más afectadas por la violencia y han evaluado también a sus perpetradores. Lo anterior les permite brindar una revisión crítica, propositiva y conocedora sobre casos relevantes, de impacto social y discusión clínica, jurídica y forense; así que unen sus conocimientos para responder una pregunta central en esta obra: ¿Cómo se investiga y se resuelve un delito?

*Nikolic, Marko. (2017). Legal and criminological psychology. New York: Delve publishing.*

Criminal (criminological) psychology, is the study of the wills, thoughts, intentions, and reactions of criminals and all that partakes in the criminal behavior.

Psychiatrists and psychologists are an important part of system that can assess both mental and physical states. profilers have an increasing role in solving the most serious crimes. Understanding what drives the criminal is of paramount importance.

*Rosenthal, Howard. (2017). Encyclopedia of counseling. New York: Routledge.*

With more questions and answers than any other edition, the *Encyclopedia of Counseling*, Fourth Edition, is the book you need to pass the NCE, CPCE, and other counseling exams. Every chapter has new and updated material.

The book's new and improved coverage incorporates a range of vital topics, including social media, group work in career counseling, private practice and nonprofit work, addictions, neurocounseling, research trends, the DSM-5, the new ACA and NBCC codes of ethics, and more.

#### **Magnitude and extent of gambling disorder in the Mexican population.**

Jorge Ameth Villatoro Velázquez

Dirección de Investigaciones Epidemiológicas y Psicosociales, Instituto Nacional de Psiquiatría Ramón de la Fuente. CDMX, México.

**Abstract:** Introduction. Gambling disorder is characterized by an uncontrollable need to gamble, lack of control over gambling, prioritizing gambling over other activities, and continuing to gamble despite the negative consequences this entails. Worldwide, between .1% and 5% of people show signs of problem gambling and between .1% and 2.2% present a positive result in gambling disorder criteria. Objective. To determine the extent of the problem of gambling disorder in México and to identify and analyze the demographic groups in which it occurs. Method. ENCODAT 2016-2017 is a probabilistic, multi-stage survey with national and state representativeness. The sample comprises 56 877 people who answered a standardized questionnaire that collects information on addictive substance use and other areas such as gambling disorder. Results. A total of 24.5% of the population aged 12 to 65 have played a betting game at lifetime. Men have higher statistically significant prevalences than women in nearly all types of gambling and in six of the nine symptoms of gambling disorder. In México, .3% of the target population meet the criteria for gambling disorder, with adolescents showing the highest percentage (.4%). Discussion and conclusion. It is necessary to reinforce public policies for this issue that include the development of preventive actions targeting the adolescent and youth population in México, and to ensure the adequate monitoring of authorized centers.

Salud Mental. Vol. 41(4) 2018, pp. 157-167.

**Myers, John E. B. (2017). *Legal issues in clinical practice with victims of violence*. New York: The Guilford Press.**

From a leading expert on interpersonal violence, this book explains what mental health clinicians need to know about the legal system and their role in it, particularly when working with victims of child abuse, neglect, or domestic violence. John E. B. Myers provides an accessible overview of the criminal and civil justice systems, focusing on laws, cases, and procedures that are relevant to clinical practice. Numerous illustrative examples and legal cases are included.

The book examines how interpersonal violence is proven in court and offers practical guidance for responding to subpoenas, interacting with legal personnel, testifying as an expert witness or fact witness, and managing liability and malpractice risks.

**Lyman, Michael D. (2017). *Drugs in society. Causes, concepts and control*. New York: Routledge.**

This book focuses on the many critical areas of America's drug problem, providing a foundation for rational decision-making within this complex and multidisciplinary field. Lyman offers a comprehensive big-picture examination of the US drug problem, dealing with drugs, abusers, drug enforcement, and public policy.

Organized in three sections: Understanding the Problem, Gangs and Drugs, and Fighting Back, topics covered include the business of drugs and the role of organized crime in the drug trade, drug legalization and decriminalization, legal and law enforcement strategies, an analysis of the socialization process of drug use and abuse, and a historical discussion of drug abuse that puts the contemporary drug problem into perspective.

**Powell, Bert. (2016). *The circle of security intervention. Enhancing attachment in early parent-child relationships*. New York: The Guilford Press.**

Presenting both a theoretical foundation and proven strategies for helping caregivers become more attuned and responsive to their young children's emotional needs (ages 0-5), this is the first comprehensive presentation of the Circle of Security (COS) intervention.

The book lucidly explains the conceptual underpinnings of COS and demonstrates the innovative attachment-based assessment and intervention strategies in rich clinical detail, including three chapter-length case examples.

Reproducible forms and handouts can be downloaded and printed in a convenient 8 1/2" x 11" size. COS is an effective research-based program that has been implemented throughout the world with children and parents experiencing attachment difficulties.
