*Tran, Tracy. (2025). Wiring the nervous system: mechanisms of axonal and dendritic remodelling in health and disease. Denmark: River Publishers.*

This book examines recent key findings on the mechanisms of axonal and dendritic remodeling in different model organisms.

Each chapter provide and discuss the latest discoveries ranging from neuronal morphogenesis during development, experience-dependent structural plasticity, to neuronal degeneration, regeneration, and pathologies in neurological disorders.

Topics discussed in the book include: Axonal degeneration during development and in pathological or disease conditions; Neuronal morphogenesis (axons and dendrites); Experience-dependent structural plasticity to synaptogenesis; Dendrite degeneration and regeneration.

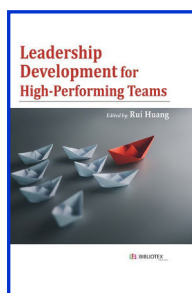

*Huang, Rui. (2024). Leadership development for high-performing teams. Bibliotex Digital Library.*

Effective leadership development programs focus on equipping individuals with the necessary skills, such as communication, collaboration, and decision-making, to lead high-performing teams.

By fostering a supportive and empowering environment, leaders can inspire and motivate their teams to achieve goals, drive innovation, and maximize product\_backupivity.

This book explore the key principles and strategies necessary for effective leadership in today's dynamic and competitive environment.

With practical tools and techniques, it offers guidance on team building, motivation, communication, and conflict resolution.

### Frases para recordar

“Intelligent behavior arises from a harmonious partnership between reason and emotion.

While the first provides direction and clarity, the second drive and motivation are essential for achieving desired outcomes”

Jonathan Haidt

Keshavan, Matcheri (2024).  
**Schizophrenia: a practical primer.**  
NY: Routledge.

Written to help anyone who is faced with managing schizophrenia, whether as a clinician, patient, friend, or family member, this book is an first stop for practical, up-to-date information.

It includes an overview of schizophrenia and provides answers to common questions that arise on different aspects of the illness, such as: diagnosis, pharmacological and psychotherapeutic management, treatment challenges and achieving recovery.

Marshall, Jane. (2024).  
**Aphasia: the basics.**  
London: Routledge.

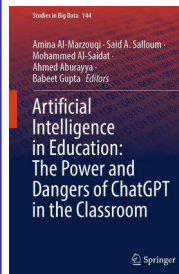

This book describes the varied manifestations of aphasia on speech, comprehension, reading and writing.

Chapters explore how aphasia presents across different languages and in bilingualism, as well as the impacts of aphasia on a person's life and the effects for family members.

The text also considers recovery in aphasia and how that recovery can be enhanced by a range of interventions.

All topics are informed by extensive research and personal accounts of individuals living with aphasia.

The book provides an invaluable introduction to aphasia for students of speech and language therapy, health professionals and others with an interest in stroke care.

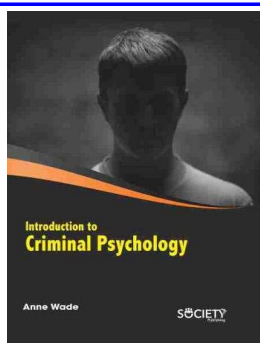

Gupta, Babeet (2024).  
**Artificial Intelligence in Education: The Power and Dangers of ChatGPT in the Classroom.** Springer.

ChatGPT is a language model developed by OpenAI that has the ability to generate human-like text based on a prompt. The use of ChatGPT in education has the potential to revolutionize the way we learn, teach, and access information.

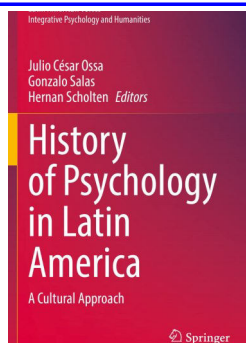

The book seeks to publish original manuscripts that cover topics, from the development of new chatbot technologies and their integration into the classroom, to the examination of the ethical and pedagogical implications of these systems.

The ultimate goal is to advance the understanding of ChatGPT and its role in education and to promote its effective and responsible use in the classroom and beyond.

Shondrah, Nash.  
(2024). Breaking  
apart intimate  
partner violence  
and abuse.  
NY: Routledge

This book provides a examination of intimate partner violence and abuse, encompassing the nature, influences, and impact of its presence in interpersonal relationships.

This overview surveys the prevalence, patterns, and common risk factors among a number of demographics, including women, men, transpeople, partners in opposite- and same-sex relationships, teen dating partners, later-life partners and abused partners with disabilities.

The authors also disentangle the factors of race, class, gender, sexuality, gender expression and culture by exploring their effects on experiences of intimate partner violence and abuse perpetration and victimization.

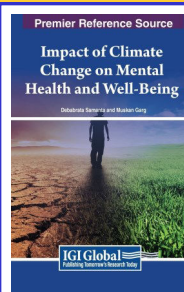

Hooley, Tristram.  
(2024) Online  
research: research  
methods. London:  
Bloomsbury  
Publishing.

This book provides an introduction to online research, covering ethics, surveys, focus groups, ethnographies, experiments and the gathering and analysis of naturally occurring digital/big data.

It also asks how researchers should use the digital environment to communicate their research and looks forward to the future of the field, asking what the next ten years hold.

Online research is rarely well served by the direct translation of onsite methods onto the internet.

Rather, researchers need to reflect, adapt and redesign research as they change the mode through which they conduct their research.

Garg, Muskan.  
(2024) Impact of  
climate change  
on mental health  
and well-being.

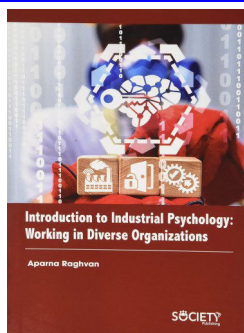

Climate change has far-reaching consequences beyond its environmental impact. It also significantly affects human social and mental well-being, both at individual and community levels.

In this exploration, this book transcends the traditional discourse on climate change by delving into its repercussions on the social and mental fabric of our communities.

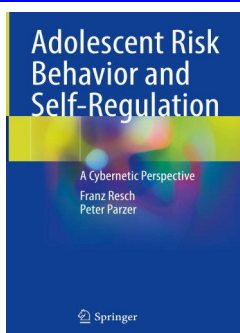

By emphasizing a multi-faceted approach, it advocates for reducing greenhouse gas emissions, sustainable development, climate-resilient communities, and robust mental health services.

It empowers readers to take actionable steps toward a sustainable and mentally resilient future.

DIVERSE ORGANIZATIONS

ADOLESCENT RISK BEHAVIOR  
AND SELF-REGULATION

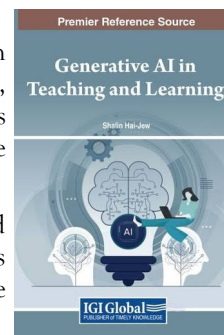

THE CREATION OF  
SCIENTIFIC PSYCHOLOGY

*Hai-Jew, Shalin. (2024). Generative AI in teaching and learning. Hershey: IGI Global.*

This book delves into the revolutionary field of generative artificial intelligence and its impact on education. It explores the use of generative AI in nonformal and informal teaching and learning, emphasizing the opportunities for self-learning, group learning, and social change that arise from its implementation. It also delves into the professional ethics surrounding the application of generative AI in education.

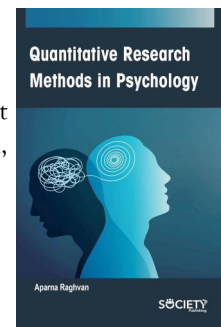

While examining the potential benefits of generative AI, the book also addresses the risks associated with demotivation for skill acquisition, deskilling, and downskilling. It highlights the opportunities for upskilling and encourages educators and learners to engage in learning practices that leverage the power of generative AI.

*Raghvan, Aparna. (2023). Quantitative research methods in psychology. Ontario: Society publishing.*

An overview of quantitative psychology research is presented in this book.

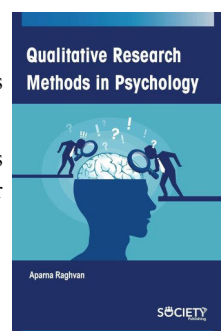

Together with data analysis, systemic equations, and longitudinal designs, it goes on to discuss layout and functionality, different assessment concepts, the importance of scaling in quantitative research, and information gathering.

*Raghvan, Aparna. (2023). Qualitative research methods in psychology. Ontario: Society publishing.*

An introduction to qualitative research in psychology is provided in the beginning chapter of this book.

It mentions the method of collecting data for qualitative research in addition to the visual techniques employed. Furthermore, it examines the different application forms of qualitative research, together with discourse and narrative analytical techniques.

#### How can counselling training courses better prepare their trainee therapists to work with LGBTQ+ clients?

Sims, Michael: School of Education, Bath Spa University, Bath, United Kingdom.

**Abstract:** The purpose of this study was to explore the clinical and training experiences of recently qualified, LGBTQ+ identifying therapists who work with sexuality and gender diverse clients, in order to discover ways in which counselling training organisations might better prepare their trainees to work competently with this particular client group. Method One-to-one, semistructured interviews with five therapists were conducted. Data collected from these interviews were subsequently analysed using the seven steps of interpretative phenomenological analysis. Findings The analysis revealed six superordinate themes: Enhance tutors' LGBTQ+ knowledge and cultural awareness; Provide students with adequate supervision; Teach a range of LGBTQ+ topics; Integrate LGBTQ cultural competence training throughout the curriculum; Invite LGBTQ+ specialists; and Signpost students to additional resources. Conclusions Participants felt unprepared by their entry-level counselling training to work with LGBTQ+ clients. The perceived lack of LGBTQ+ knowledge and understanding of their tutors was regarded as a contributing factor to the limited time and depth of LGBTQ cultural competence training received. Recommendations Entry-level counselling training courses should integrate LGBTQ cultural competence training throughout their curriculums in order to adequately prepare their trainees to work competently with LGBTQ+ clients. Additionally, it is important that counselling educators maintain their own LGBTQ+ knowledge, understanding and skills.

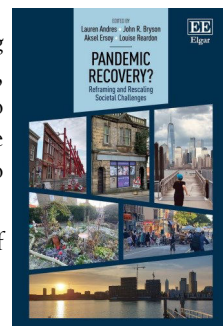

Counselling & Psychotherapy Research. Vol.24,(2), 2024, pp. 513-523.

**Andres, Lauren. (2024). *Pandemic recovery?: reframing and rescaling societal challenges*. Edward Elgar Publishing.**

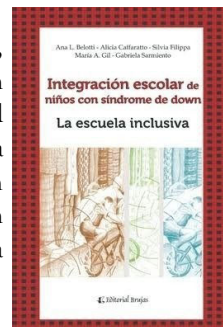

This book provides examination of pandemic recovery in the context of reframing and rescaling broader societal challenges. Chapters independently engaging with different aspects of recovery, simultaneously unpacking recovery in practice and in various settings. This critical analysis is split into five thematic sections exploring people, organisations, climate change and sustainability, and the policy and practice of recovery. The expert contributors highlight a clear consensus throughout that no shock is ever isolated from others and discuss how this can adversely impact recovery processes.

The book further argues that this recognition paves the way for the development of a social science of recovery, but also preparedness for future shocks and the fostering of resilience.

**Belotti, Ana. (2024). *Integración escolar de niños con síndrome de Down, en la escuela inclusiva*. Editorial Brujas.**

En la primera edición de este libro, se muestra la implementación de un programa de integración, basado en los paradigmas y en los conceptos básicos que sustentan esta práctica que aún hoy sigue en vigencia y que es el modelo que sostienen muchos equipos de integración. En nuestro caso, el quehacer cotidiano en las escuelas comunes, nos llevó a concretar aquella intención de escuela inclusiva desde el momento en que no sólo nos sentimos responsables por nuestros alumnos con Síndrome de Down sino que entendimos que el derecho a la educación debe ser en realidad un derecho a una buena educación para todos los niños no sólo para aquellos portadores de una patología que determina necesidades educativas especiales .

**Rodríguez, Josefina. (2023). *Psicología siglo XXI: una mirada amplia e integradora*. Madrid: Editorial Dykinson.**

En este libro se exponen estudios y artículos de investigación relacionados con la psicología, desde diferentes ámbitos de conocimiento. Son diversas las temáticas que se analizan, actitudes hacia la muerte, motivación hacia la práctica deportiva y salud mental por confinamiento en tiempos de pandemia por Covid-19.

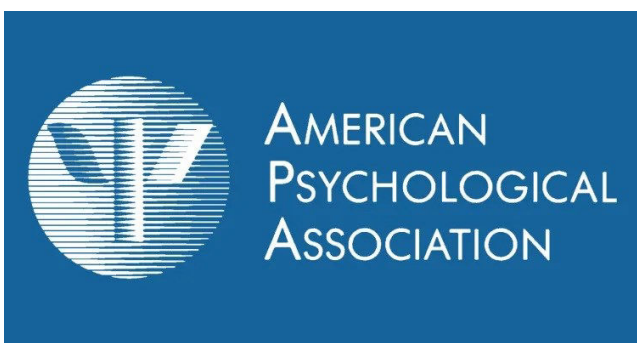

Otros relacionados con las prácticas de crianza de madres con niños con síndrome de Down, detección temprana como prevención de dificultades de aprendizaje y búsqueda de relación entre el estilo de crianza y el apego en adultos tempranos, entre otras temáticas.

Estos trabajos forman parte de un continuo de las investigaciones, dentro de la psicología como ciencia, en el siglo XXI.

### Recomendación digital:

**Recursos y publicaciones LGBTQ de la APA:** La APA ha contribuido significativamente a la comprensión de las personas lesbianas, gays, bisexuales, transexuales e intersexuales desde que dedicó por primera vez tiempo de su personal a estas poblaciones en 1987. A lo largo de los años, la APA ha producido muchos recursos para educar al público, apoyar el trabajo de los psicólogos e informar a la política pública sobre las personas LGBTQ y sus vidas y necesidades de salud. Esta página proporciona muchos de esos recursos, organizados por el público principal al que están destinados.
