Frases para recordar

"La vida no es lo que se supone que debe ser.
Es lo que es.
La forma de lidiar con ella es lo que hace la diferencia"

Virginia Satir
(1916–1988)

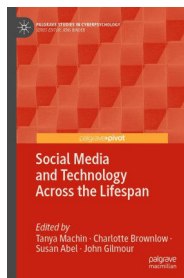

Centro de Documentación "Dr. Rogelio Díaz Guerrero" Libros digitales en Librunam

Machin, Tanya. (2022) Social Media and Technology Across the Lifespan Cham: Palgrave.

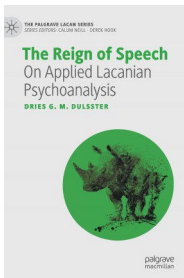

This book explores social media and technology across the lifespan.

The authors argue that those of different ages and life stages have very diverse experiences with these types of media and demonstrate the importance of analysing the entire lifespan in the context of technology use.

They acknowledge and celebrate social media for the positives that it can bring to our lives but also recognise that there may be challenges for particular developmental stages.

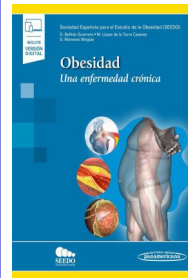

Dulsster, Dries. (2022). The Reign of Speech: On Applied Lacanian Psychoanalysis. Cham: Palgrave.

This book provides an in-depth examination of Lacanian oriented psychotherapy and supervision, drawing on a wide range of Lacanian texts and rich interview data.

Beginning with a comprehensive overview of the Lacanian psychoanalytic therapeutic process, it next considers this in relation to Lacanian texts - including, 'The Function and Field of Speech and Language in Psychoanalysis', 'Direction of the Treatment', 'Lacanian Discourses' and 'Seminar XXIII' - and interview data from ex-analysants and psychoanalysts.

The second part of the book offers the first systematic discussion of Lacanian supervision.

Bellido, Diego. (2023) Obesidad: una enfermedad crónica. Madrid : Editorial Médica Panamericana

A pesar de que la obesidad es considerada como enfermedad crónica recidivante, no existe todavía una concienciación suficiente en el ámbito sanitario ni en la sociedad. La obesidad no es una opción de vida, ni tampoco debe considerarse solo un factor de riesgo que puede producir o agravar otras enfermedades. Afecta a más de una cuarta parte de la población de los países desarrollados y sigue creciendo de forma imparable en todo el mundo.

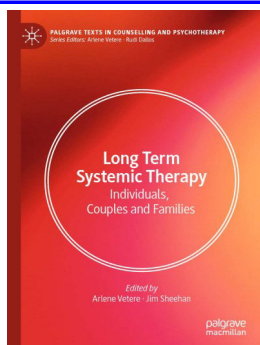

Reconocerla como enfermedad crónica recidivante es un importante punto de partida para destinar esfuerzos y recursos, y debe abordarse como una enfermedad controlable que requiere una atención de por vida.

Agadí, K. B. (2023). Internet search engines and libraries. Burlington: Society Publishing.

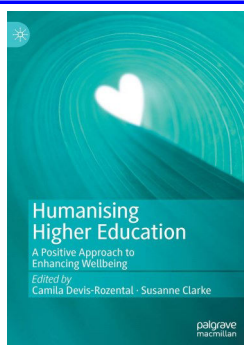

There are several reasons why libraries are hesitant to take action to improve the problem. With the advancement of technology and the increase in the amount of content available on the internet, it has become more difficult for users to find and use information, as well as for content providers to classify and catalog documents. With the passage of time, various strategies and technologies for handling information more quickly and effectively have arisen. This book examines search engines, which are a useful tool for library personnel. The book examines different elements of search engines, such as the history of search engines and how search engines work.

Hernández Sampieri, Roberto. (2023). Metodología de la investigación. CdMx: McGraw Hill.

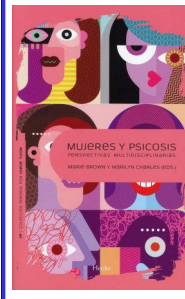

Esta segunda edición de Metodología de la investigación: Las rutas cuantitativa, cualitativa y mixta, incluye varios ejemplos de distintas ciencias y disciplinas vinculados al tema de la pandemia por SARS-CoV-2 y la enfermedad COVID-19 que muestran la investigación que se generó para afrontarla en todo el mundo.

Orientado a asignaturas sobre investigación, metodología, metodología de la investigación, métodos de análisis y similares dentro de diversas ciencias o disciplinas; asimismo, para que se utilice en campos de la salud, sociales, jurídicos, administrativos, económicos, etcétera.

Folk, Linda. (2022). The Hidden barriers and enablers of team-based ideation. Cham: Springer.

This book explores elements of team dynamics and interactions that block or enable effective ideation. Author investigates interpersonal dynamics, inhibitors of collaboration and boosters of ideation efficiency that govern the ability of a team to generate new and valuable ideas. Where it is accepted that teams are a necessity in the creative process, this work highlights the inconsistency in terms of quality and reliability of creative output when looking at teams. Why do some teams struggle, and others succeed in innovating? This book offers a resource for those interested in the qualities and interventions that can impact the ideation potential of a team.

Brown, Marie. (2022). Mujeres y psicosis. Barcelona: Herder.

En este recorrido se busca comprender la interacción de dos identidades marginadas, aquellas consideradas «psicóticas» y las mujeres, y luchar contra esta doble marginación y sus raíces discriminatorias.

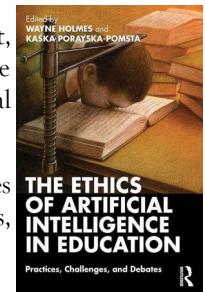

Con frecuencia, las experiencias de las personas consideradas «locas», en particular las mujeres, han sido explicadas por otros, ya sea por la teoría o por la ciencia.

De allí que en este libro se busque desestabilizar adrede los textos académicos tradicionales de un modo que honre las experiencias femeninas, subjetivas y marginadas, de lo que, comúnmente, recibe el nombre de «psicosis».

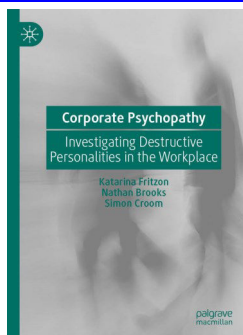

Holmes, Wayne. (2023). The ethics of artificial intelligence in education. New York: Routledge.

This book identifies and confronts key ethical issues generated over years of AI research, development, and deployment in learning contexts. Adaptive, automated, and data-driven education systems are increasingly being implemented in universities, schools, and corporate training worldwide, but the ethical consequences of engaging with these technologies remain unexplored.

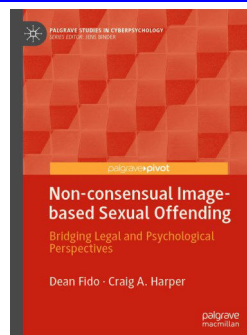

Featuring expert perspectives from inside and outside the AIED scholarly community, this book provides AI researchers, learning scientists, educational technologists, and others with questions, frameworks, guidelines, policies, and regulations to ensure the positive impact of artificial intelligence in learning.

Vitale, Jennifer E. (2022). The Complexity of Psychopathy. Cham: Springer.

This book provides a nuanced view of psychopathy by linking this syndrome to acknowledged DSM categories and exploring diverse theoretical perspectives for the conceptualization of this condition.

While other volumes focus on the uniqueness of the disorder, this book highlights the heterogeneity of psychopathy and the implications of that heterogeneity for research and treatment.

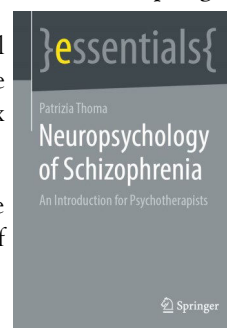

Directed to both clinicians and researchers, this volume aims to improve understanding and treatment for this complex condition.

Thoma, Patrizia (2022). Neuropsychology of Schizophrenia: An introduction for psychotherapists. Wiesbaden: Springer.

This essential discusses schizophrenia in a brief, concise manner in light of its developmental neurobiological pathology. It primarily addresses current neuropsychological findings on cognitive dysfunction in schizophrenia as well as common neuropsychological models to explain the complex and heterogeneous psychopathology.

A primary concern of the book is to clarify the extent to which these findings can play a role in the treatment of schizophrenia with regard to their use in psychoeducation as well as the design of (meta)cognitive therapy programs.

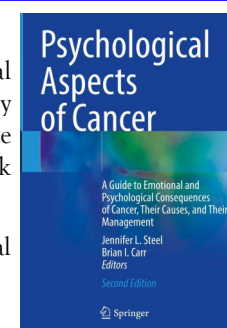

Steel, Jennifer. (2022). Psychological Aspects of Cancer. Cham: Springer.

This book addresses the unmet needs of the medical community in dealing with the psychological problems, particularly anxiety and depression, of patients diagnosed with cancer. Providing a scholarly review of the impact of cancer diagnosis on patients' emotional and psychological status, as well as the evidence that psychological factors impact cancer occurrence and biological behavior, this book explores the therapeutic implications of such converse dynamics.

Chapters review financial toxicity, eHealth, palliative care, mindfulness, sleep and cancer, social support and cancer, cultural diversity, pediatric and adolescent oncology, and geriatric oncology.

The final chapter also provides practical information on available resources for patients.

The impact of major earthquakes on students' emotional distress and internalizing symptoms, externalizing behaviors, and coping during the implementation of keepin' it real-mexico.

Medina-Mora, María Elena: Facultad de Psicología, UNAM, Av. Universidad 3004, Col. Copilco - Universidad, México City, México.

Abstract: This article reports on effects of two earthquakes in Mexico on adolescents attending middle school. The earthquakes struck in close succession during the implementation of a school-based prevention program, providing an opportunity to assess emotional distress due to the earthquakes and whether the life skills taught in the program affected how students coped with the natural disaster. The objectives were to (1) evaluate the earthquakes' impact on students' distress; (2) assess if distress is associated with internalizing symptomology and externalizing behaviors; and (3) investigate if students receiving the original and adapted versions of the intervention coped better with the events. A Mexico-US research team culturally adapted keepin' it REAL to address connections between substance use among early adolescents in Mexico and exposure to violence. A random sample select of public middle schools from three cities (Mexico City, Guadalajara, and Monterrey). A total of 5522 7th grade students from 36 schools participated in the study. Students answered pretest and posttest questionnaires; the latter assessed earthquake-related distress and coping strategies. Compared to controls, students in the adapted intervention reported less aggressive and rule-breaking externalizing behavior and less violence perpetration. However, these intervention effects were not moderated by the level of earthquake-related distress, and they were not mediated by positive or negative coping. The findings have implications for prevention intervention research and policy as natural and human-made disasters occur more often.

Etcgorry, Mariana. (2022). Diálogos de saberes en torno al diagnóstico psicopedagógico. Córdoba: Brujas.

Este libro es una invitación a intercambiar ideas, conocimientos y experiencias que constituyen saberes en relación a la práctica diagnóstica en psicopedagogía.

El diálogo se abre desde las cátedras de Diagnóstico Psicopedagógico de la Universidad Provincial de Córdoba a otras universidades, espacios formativos y profesionales; pero fundamentalmente a aquellos que se adentren en sus páginas.

Con cada texto buscamos trascender el tiempo y el espacio para actualizar discusiones y debates, construir nuevos saberes que enriquezcan la práctica diagnóstica en diferentes ámbitos de trabajo psicopedagógico.

Valach, Ladislav. (2022). Casebook Suicide and Suicide Prevention: Twelve suicide attempts analyzed by action theory. Berlin: Springer.

Usually, after a suicide attempt, people are treated in a hospital, where professionals try to work out the underlying psychiatric illness. Author, however, argue that suicide is not an illness but an action. Since this understanding is based on a high regard for everyday accounts of one's own experiences, the suicidal persons are given the stage in this book.

The book presents twelve different cases after a suicide attempt. In the analysis of the conversations, attention is paid to the theory of action in everyday life. By presenting the long-term, medium-term and short-term concerns of the patients or the actions in the stories, practitioners gain a detailed insight into the underlying causes of the suicidal act and its treatment.
